Chicago, IL | beldeirawi@gmail.com | [linkedin.com/in/baraa-eldeirawi](https://www.linkedin.com/in/baraa-eldeirawi) | github.com/beldeirawi01

SUMMARY

Computer Science student (graduating Dec 2026) focused on QA and test automation, with hands-on experience in software testing, troubleshooting and network installation. Completed a five-month SDET bootcamp (JavaScript, Cypress, API testing, SQL, Jira, Page Object Model). Pursuing CompTIA A+. Bilingual in English and Arabic.

TECHNICAL SKILLS

Test automation: Playwright, Vitest, Supertest, Jest, Page Object Model, cross-browser testing, GitHub Actions CI/CD. **Also studied:** Cypress, Jira, API testing (bootcamp)

Programming: TypeScript, JavaScript, SQL, PostgreSQL, HTML, CSS

Tools: Git, GitHub, VS Code, Node.js

Field IT: Cat6 cabling and termination, network connectivity, cable testing and fault finding, PC assembly, hardware diagnostics

PROJECTS

Offices-App (Jobscribe) — TypeScript, React, React Native, PostgreSQL github.com/beldeirawi01/Offices-App

- Built a full-stack voice-to-invoice app (Express API, React dashboard, Expo mobile app, Prisma/PostgreSQL) for HVAC, plumbing and electrical techs
- Wrote 115 backend integration tests (Vitest, Supertest) that run against a real PostgreSQL database in CI, covering auth, cross-tenant isolation, invoice send/void guards, webhook idempotency and subscription gating; plus a Playwright E2E suite and Jest mobile tests
- Implemented a pipeline: audio stored in S3, transcribed with OpenAI Whisper, billing fields extracted as JSON via the Claude API into a draft invoice; integrated Stripe Connect, Twilio SMS and a node-cron reminder scheduler

SauceDemo Test Automation Framework — Playwright, github.com/beldeirawi01/sauce-demo-playwright-framework
TypeScript

- Built a Page Object Model framework with 30 tests across login, inventory/cart and checkout flows
- Configured GitHub Actions to run the suite on Chromium, Firefox and WebKit on every push and pull request
- Designed parameterized locators (e.g., addToCart(productSlug)) covering all 6 products, with data-driven assertions derived from input arrays

EXPERIENCE

Tech 1 Solutions — Installation Intern, Chicago, IL Aug 2026 – Present

- Install low-voltage cabling and establish network connectivity in clinical settings
- Terminate and test Cat6 runs with a crimper, punch-down tool and cable tester, verifying connectivity and fixing faults

Mosque Foundation — Volunteer, Bridgeview, IL Jan 2024 – Present

- Coordinate logistics for 10–20 volunteers across 6–12 youth events a year serving 100+ participants; streamlined setup, cutting setup time by about 20%

Menards — Forklift Operator (Aug 2025 – Present); Inventory Associate (Apr – Aug 2025)

- Zero safety incidents while supporting ~50–75 customer transactions per shift; cut product-retrieval time ~15–20% by reorganizing the yard layout

CVS — Pharmacy Technician, Evergreen Park, IL Nov 2021 – Aug 2022

- Verified insurance and dosage details on ~100–150 prescriptions daily while maintaining HIPAA-compliant records

EDUCATION & CERTIFICATIONS

University of Illinois at Chicago — B.S. in Computer Science Expected Dec 2026

Moraine Valley Community College — A.S. in Computer Science Dec 2023

Coursework: Software Design, Programming Language Design & Implementation, Intro to Data Science, Database Systems (in progress)

Certifications: SDET Bootcamp, QA/Test Automation (5 months); CompTIA A+ (in progress)
